OUR MISSION

Commtech Design is a Communications and IT Design Firm that provides technology design services to businesses and schools. Working with us will assure you of a complete technology design experience that includes:

- Creating a plan that successfully integrates your existing system, technology, and architectural design.
- Working within your budget.
- Transparent communication when discussing budgetary limitations.
- Comprehensive documentation of meeting minutes from each project and contractor meeting.
- Detailed and coherent equipment specifications.
- Intricate and thorough AutoCAD drawings.
- The assurance of your system remaining viable in the future as technology continues to advance.
- Discussions and consultation regarding any questions about technology you may have for us.
- A feeling of inclusion, empowerment, and excitement while working together on your new technology system.

WHY CHOOSE US

1. Detailed Design

Commtech Design offers comprehensive consulting and design services to meet all your requirements from beginning to end. The detailed design provides the owner and contractor with a specific system for pricing, installation, and implementation across the building(s).

2. Experienced and Knowledgeable Team

Our expert team is dedicated to supporting you every step of the way in the design process, from the initial proposal to the implementation phase. We prioritize working closely with you as a vital team member, providing unbiased and tailored advice to help you reach your objectives.

3. Seamless Process

We collaborate with all stakeholders to grasp your individual requirements, offering a detailed illustration. This includes specification documents and AutoCAD drawings, enabling you to confidently seek quotes and evaluate proposals.
